## **Reynolds Green Spaces Project**

To Whom It May Concern:

The Board of Education No. 61 (Victoria) Facilities Department is please to offer its support to this exciting and innovative project. This project will contribute to the preservation of existing natural systems and allow for the revitalization and transformation of the courtyard area to a more usable, self sustaining and natural area.

Our Department faces many challenges throughout the District in maintaining these types of areas and welcomes the opportunity to work with staff and students at Reynolds Secondary and the Leadership Victoria Community Action Project Team.

Our involvement with Leadership Victoria on a previous project resulted not only in a wonderfully revitalized area for the enjoyment of staff, students and the community but also an area that offers increased learning opportunities for students.

I believe that this phased project at Reynolds will offer similar opportunities for current and future staff and students and will greatly enhance the Environmental and Sustainability Course scheduled to begin in September 2008.

We look forward to seeing this project move forward and will be pleased to offer support wherever possible.

Seamus Howley  
Director of Facilities  
School District #61
